Suriqui Water Project Feasibility Study – Request for Quote

9/30/2017

Engineers in Action (EIA) and Fundacion Ingenieros en Accion (FIEA) are engineering non-profit organizations based out of Tulsa Oklahoma and La Paz Bolivia respectively. EIA is working with the island of Suriqui, Bolivia to design/upgrade their drinking water treatment systems. EIA has asked AguaClara Reach, a New York State nonprofit (501(c)3 pending), to provide sustainable water treatment solutions for the Island of Siriqui in Lake Titicaca.

AguaClara Reach requests a quote from Agua Para el Pueblo for three (3) separate prefabricated 1 liter per second plants from Agua Para el Pueblo, each including filtration. We request that you deliver the quote by October 10, 2017.

Sincerely,

A handwritten signature in black ink, appearing to read "Maysoon Sharif", with a long horizontal flourish extending to the right.

Maysoon Sharif
Executive Director
